More than 7 years of experience on the digital field specialized on UX design, both in multinational and consultant companies -working with top tier global clients from the financial, sports, healthcare and insurance industry.

We help our clients to achieve their objectives in end to end and tactical projects -strategic definition, early conceptualization, product definition, design, testing and iteration. How? Understanding their business goals, user needs and technological capabilities, and translate them into tangible digital products.

Studies & professional experience
